STORM REPORT

FEBRUARY 27, 2006, TO FEBRUARY 28, 2006

The storm that began on Monday afternoon, February 27, 2006, is expected to pass this afternoon. As of 6:30 a.m. on February 28, the storm produced total precipitation amounts as follows:

Downtown Los Angeles	1.54 inches
San Gabriel Mountains	3.94
San Gabriel Valley	2.37
Santa Clarita Area	2.56
San Fernando Valley	1.82
Malibu	1.97
Antelope Valley	1.14

Our Flood Maintenance and Road Maintenance personnel continue to monitor road conditions. Dams are holding water, and spreading of water for water conservation has been initiated.

Live Oak Road just west of The Old Road in the Castaic area was closed on February 28, 2006, as a result of a downed powerline. Avenue T and Avenue S at Big Rock Wash were closed due to water flowing over the roadway and are expected to be reopened when the flooding subsides.

We continue to monitor potential landslide movement at Hume Road in the Santa Monica Mountains, Montellano Avenue in Hacienda Heights, and Plum Canyon Road in the Santa Clarita area. We have no major incidents to report at these locations.
